## AGRO BIO FERTILIZER

### SLOW-ACTING ORGANIC FERTILIZER

Marketing and use certificate No. .... issued by the Bulgarian food safety agency.

Nutrient ingredients:

Organic matter	60%
Dry matter	80-85%
Total nitrogen N	2-3%
Total phosphorus P <sub>2</sub> O <sub>5</sub>	1-3%
Total potassium K <sub>2</sub> O	1-3%
Magnesium Mg	0.5%

pH 7-8

Contains processed manure from a category 2 methane production facility. Within no less than 21 days of the product's use farm animals must not access the pastureland and the crops must not be used as feed.

**AGRO BIO FERTILIZER** enriches the soil with organic substances and improves its humus content. Organic matter ensures gradual mineralization and releasing of nutrients like nitrogen, phosphorus and potassium for long-lasting action. Stimulates the development of beneficial soil microflora by improving the soil's physical and chemical composition and enriching it with microelements. Benefits vegetation growth in loose soils rich in nutrients. Improves the quantity and quality of agricultural yields. Could be used for re-cultivation of damaged areas or as a component in soil substrate production for fruit tree, forest fruit and decorative vegetation nurseries.

Recommended limits and way of use:

1. Arable crops: 0.1-1 tonne / 10 acres for a period of 3 years while preparing the soil before planting, annexation of areas followed by incorporating deep soil treatment (ploughing, disking, cultivation).
2. Perennial crops (fruit trees, vineyards, Rubus species): 0.5-2 tonnes / 10 acres for a period of 3 years before and during planting or soil treatment / hoeing of existing crops.
3. Decorative and forest species: 0.5-2 tonnes / 10 acres irrespective of year of establishment for treatment between and on beds including hoeing.
4. Nurseries: up to 3 kg / sq m, with soil treatment.
